gauss: objective gap
$J(\psi^k) - J^\star$
inner iteration k
scalar-step PDHG
preconditioned, $\sigma_\mu/\sigma_\Lambda = 1$
preconditioned, $\sigma_\mu/\sigma_\Lambda = 10$
preconditioned, $\sigma_\mu/\sigma_\Lambda = 100$
gauss: certificate vs gap, $\sigma_\mu/\sigma_\Lambda = 10$
inner iteration k
true gap
certificate (projected)
certificate (Remark 4 as written)
quartic: objective gap
$J(\psi^k) - J^\star$
inner iteration k
scalar-step PDHG
preconditioned, $\sigma_\mu/\sigma_\Lambda = 1$
preconditioned, $\sigma_\mu/\sigma_\Lambda = 10$
preconditioned, $\sigma_\mu/\sigma_\Lambda = 100$
quartic: certificate vs gap, $\sigma_\mu/\sigma_\Lambda = 10$
inner iteration k
true gap
certificate (projected)
certificate (Remark 4 as written)
